Subject: Important Vaccination Reminder: Tetanus and Diphtheria Immunization

for Grade 5 and 10 only. Date of Immunization : 6th July 2023

Dear Parents/Guardians,

Greetings from TMPIS SURAT!!!!

We hope this message finds you and your family in good health. We wanted to take a moment to remind you about the importance of tetanus and diphtheria vaccination for the well-being of your child.

Tetanus and diphtheria are serious bacterial infections that can have severe consequences if left untreated. Tetanus, often known as "lockjaw," affects the nervous system and can cause muscle stiffness and spasms, making it difficult to breathe and swallow. Diphtheria is a highly contagious respiratory illness that can result in breathing difficulties and damage to the heart, kidneys, and nerves.

Immunization is the most effective way to protect your child from these potentially life-threatening diseases. The tetanus and diphtheria vaccines have been extensively tested and are considered safe and reliable. They not only provide individual protection but also help prevent the spread of these illnesses within the community.

We encourage you to check your child's vaccination records and consult with their healthcare provider to determine if they are due for a tetanus and diphtheria booster shot. It's also an excellent opportunity to discuss any concerns or questions you may have about vaccinations in general.

Remember, by keeping your child's immunizations records, you are safeguarding their health and contributing to the overall well-being of our community. If you have any doubts or need assistance in locating a healthcare provider, please don't hesitate to reach out.

Thank you for your attention to this matter and for prioritizing your child's health and safety.

The Immunization will be done during the school hours. (Between 9:00 am to 12 noon)

Note : We will also be sharing a consent form with this. If you agree to give your child the above vaccination, please tick on "Yes" and if you don't want to give your child the vaccine or the child has already taken the vaccine, please tick on "No".

Regards

K.Maxwell Manohar
